

Project: MyHarvestHub – Comprehensive Feature Blueprint

Vision:

To create a unified, AI-powered, and trust-driven marketplace ecosystem that merges services (Fiverr), group buying (Groupon), e-commerce (Shopify), wholesale (Alibaba), and general retail (Temu) into one cohesive digital economy — underpinned by a secure wallet system and transparent supply chain management.

1. User Management & Access Control

Core Features:

- Multi-role account types: Buyer, Seller, Service Provider, Wholesaler, Admin
- Standard authentication (email, phone, social login)
- Passwordless & biometric login (for mobile)
- Multi-language & localization setup
- Profile creation (personal, business, service)
- KYC/AML verification via 3rd-party integrations (e.g., Jumio, Persona)
- Two-factor authentication (2FA)

Advanced Features:

- AI-driven onboarding wizard (suggests relevant features based on user intent)
- Unified account view across all marketplace verticals
- User reputation score (aggregated across services, products, and reviews)
- Smart segmentation (e.g., “Frequent Buyers,” “Top Sellers,” “Verified Pros”)

Differentiators:

- Universal Hub Identity — one profile, multiple roles across service and product ecosystems
 - Dynamic Role Switching — seamlessly toggle between buyer, seller, and service provider modes
-

2. Marketplace Framework (General + E-Commerce)

Core Features:

- Product listing (title, description, variants, SKU, price)
- Seller storefronts (custom branding, themes, policies)
- Search, filter, and sort (by relevance, popularity, rating)
- Product reviews & ratings
- Shopping cart & checkout flow
- Multi-currency & tax calculation
- Order tracking & management dashboard

Advanced Features:

- AI-driven product recommendations
- Inventory synchronization (for sellers with multiple channels)
- Dynamic pricing engine
- AR product previews and 3D product visualization
- Subscription-based products

Differentiators:

- Unified Buyer Experience — shop, book, or bulk-buy from one cart

- AI “Smart Bundles” — recommends combos of services + products (e.g., a “farm produce package” + “delivery service”)
-

3. Service Marketplace (Fiverr-like)

Core Features:

- Service listings with packages (Basic, Standard, Premium)
- Gig creation with milestones, delivery deadlines, revisions
- Order management & delivery tracking
- Buyer-seller chat & negotiation
- Ratings and portfolio display

Advanced Features:

- Escrow-based payments with release on delivery confirmation
- Skill verification badges
- Smart contract generation for large-value services
- AI-driven proposal assistance for service providers

Differentiators:

- Hybrid Gigs — ability to pair a physical product with a related service
 - Team-Based Services — enable group-based service delivery for larger projects
-

4. Wallet & Payment Ecosystem

Core Features:

- In-app wallet (deposit, withdraw, send, receive)

- Escrow management (service delivery protection)
- Transaction history and downloadable statements
- Integration with major payment gateways (Stripe, PayPal, local PSPs)
- Currency conversion and FX rates display

Advanced Features:

- Cashback & rewards program
- Crypto-compatible wallet extension (optional future phase)
- P2P transfers between users
- Split payments for group purchases
- Automated revenue share (for affiliate or referral partners)

Differentiators:

- Smart Wallet Layer — powers services, products, and group buys seamlessly
 - Unified Ledger View — displays spending across all verticals with insights & trends
-

5. Group Buying & Deals (Groupon-style)

Core Features:

- Time-bound group deals
- Minimum order quantity logic (deal activates when threshold is met)
- Discount tiers (based on participation volume)
- Invite friends/share-to-unlock features
- Real-time deal progress tracker

Advanced Features:

- AI-curated deal suggestions (based on user intent & browsing)
- “Community Deals” — user-created group purchases
- Geo-targeted deals (based on city/region)
- Dynamic pricing drop alerts

Differentiators:

- Cross-Vertical Group Buying — e.g., combine product + delivery + warranty services
 - Smart Incentives — users earn wallet credits for hosting or filling group deals
-

6. Wholesale Marketplace (Alibaba-like)

Core Features:

- B2B supplier profiles with certifications
- RFQ (Request for Quotation) workflow
- Bulk order management (MOQ, negotiation)
- Shipping & logistics integration (freight forwarding options)
- Secure escrow for high-value orders

Advanced Features:

- Trade assurance system
- Supplier performance dashboards
- Automated invoice generation
- Custom product sourcing (buyer requests, supplier bids)
- Integration with ERP systems (for large suppliers)

Differentiators:

- Multi-tier Pricing — wholesale, retail, and service tiers coexist
 - Verified Supply Chain Transparency — sustainability and origin tracking
-

7. 🧠 Search, Discovery & Personalization

Core Features:

- Universal search bar across all modules
- Category, keyword, and AI intent-based search
- Auto-suggest and predictive results
- Trending products & services

Advanced Features:

- AI-powered personalization (behavioral & contextual)
- Semantic search for natural language queries
- Visual search (image-to-product matching)
- Cross-domain recommendations (service + product)

Differentiators:

- Unified Discovery Engine — integrates services, wholesale, and products in one feed
 - Context-Aware Recommendations — suggests bundles based on user purpose (e.g., “launch a small food business”)
-

8. 🚚 Logistics, Fulfillment & Delivery

Core Features:

- Integrated shipping options (courier APIs)

- Real-time order tracking
- Return and refund management
- Inventory synchronization

Advanced Features:

- Smart routing & warehouse optimization
- Pickup point selection
- Carbon-neutral delivery option
- Automated dispatch scheduling

Differentiators:

- Integrated Fulfillment for Hybrid Orders (product + service delivery chain)
 - End-to-End Transparency Dashboard for buyers and sellers
-

9. Admin & Platform Management

Core Features:

- Role-based admin panels
- Transaction monitoring
- Content moderation & dispute resolution
- Commission setup and fee management

Advanced Features:

- AI-driven fraud detection
- Predictive analytics dashboard

- KPI monitoring (conversion rates, retention, GMV)
- User sentiment tracking

Differentiators:

- Dynamic Governance Engine — adaptive rules for fees, verification, and compliance based on region
 - AI Moderation + Manual Escalation Hybrid system
-

10. Analytics, AI & Data Intelligence

Core Features:

- Sales and earnings analytics for sellers
- User activity dashboard
- Marketplace health metrics

Advanced Features:

- Predictive analytics (churn, high-value customers)
- AI product/service matching
- Smart pricing optimization
- Demand forecasting (for wholesale and retail)

Differentiators:

- AI Growth Companion — offers actionable insights for users (“Increase visibility by adding bundle offers”)
-

11. Trust, Security & Compliance

Core Features:

- GDPR, CCPA, and PCI-DSS compliance
- KYC/AML verification for wallet usage
- User reporting & dispute management
- Account recovery and data encryption

Advanced Features:

- Blockchain-based verification for high-value trades
- Machine learning-based fraud detection
- Insurance integration for major transactions

Differentiators:

- Trust Layer™ — real-time verification, reputation tracking, and escrow transparency
-

12. Monetization & Growth

Core Features:

- Commission on transactions
- Subscription tiers for sellers (Basic / Premium / Enterprise)
- Featured listings and ad placements

Advanced Features:

- Affiliate and influencer programs
- Loyalty points and referral credits
- Dynamic commission model based on category or performance

Differentiators:

- Integrated Incentive Ecosystem — referrals, wallet credits, and group deals fuel internal economy
-

13. Platform Architecture & UX

Core Features:

- Responsive web + mobile app (iOS/Android)
- Modular architecture (supports multi-vertical expansion)
- Consistent UI design system
- Light/Dark mode and accessibility compliance

Advanced Features:

- Progressive Web App (PWA)
- Voice commerce and conversational UX
- AI assistant for search and support

Differentiators:

- “One Hub Experience” — identical UX whether you’re hiring, buying, or selling
- Cross-Vertical Continuity — same cart, wallet, and identity across all experiences
